PROFESSIONAL SUMMARY

Senior UI/UX Designer with **9 years of experience** designing enterprise web and mobile applications across **Logistics, Supply Chain, and Enterprise SaaS**. Over the years, my role has expanded beyond interface design into solving complex business and user problems through research, workflow analysis, information architecture, interaction design, prototyping, and usability testing.

Experienced in redesigning complex operational workflows, designing AI-assisted product experiences, building scalable design systems, and collaborating closely with Product, Engineering, and business stakeholders to deliver measurable product outcomes. Proven track record of improving product adoption, reducing manual effort, and creating scalable, user-centered experiences.

Now looking to transition into a **Product Designer** role, where I can apply my strong UX/UI foundation, enterprise product experience, and problem-solving approach to take broader ownership of product challenges from **discovery through delivery**. A technical background in **HTML/CSS** enables me to collaborate effectively with engineering teams and create technically feasible, scalable, and production-ready designs.

KEY ACHIEVEMENTS

- **23% → 87%** - Increased product adoption through workflow redesign, usability improvements, and AI-powered document automation.
- **40% reduction** - Reduced manual data entry through simplified business workflows and AI-assisted document extraction.
- **~10% → <0.5%** - Billing errors and complaints fell following an invoicing redesign with clearer validation and pricing breakdowns, according to an internal post-launch audit.
- **30% reduction** - Reduced front-end implementation effort by building a scalable design system with reusable components and design tokens.

CORE COMPETENCIES

- **Product & UX:** Product Discovery, UX Strategy, Product Thinking, User-Centered Design, Problem Framing, User Research, Stakeholder Interviews, Workflow Analysis
- **Interaction & Information Architecture:** Information Architecture, User Journeys, User Flows, Interaction Design, Wireframing, Prototyping, Usability Testing, Heuristic Evaluation, Accessibility (WCAG)
- **Enterprise Product Design:** Enterprise SaaS, Complex Workflow Design, Dashboard Design, Enterprise Applications, Mobile App Design, Responsive Web Design, Visual Design
- **Design Systems:** Design Systems, Design Tokens, Component Libraries, Atomic Design, UI Patterns, Design Documentation
- **Collaboration & Delivery:** Cross-functional Collaboration, Stakeholder Management, Agile/Scrum, Developer Handoff, Design QA, Design Critiques, Usability Reviews
- **Tools:** Figma, FigJam, Jira, Confluence, HTML5, CSS3, Git, Adobe Photoshop, Adobe Illustrator

PROFESSIONAL EXPERIENCE

Senior UI/UX Designer / Product Designer

Apr 2021 – Present

MatchLog Solutions Pvt. Ltd. · Mumbai

- Led end-to-end UX/UI design across **5 enterprise SaaS web and mobile products**, collaborating with Product Managers, developers, and business stakeholders from discovery through production.
- Redesigned complex logistics workflows for shipping lines, transporters, depots, and container yards, translating operational requirements into intuitive and scalable product experiences.
- Designed **CASA (Container Assessment & Survey App)**, a mobile application for container surveyors and yard operators to inspect containers, capture damage evidence, perform digital assessments, and generate inspection reports in the field.
- Conducted **user research, stakeholder interviews, workflow analysis, competitive analysis, and usability testing** to identify pain points and validate design decisions.
- Designed an **AI-powered document extraction workflow** using the ChatGPT API to parse Delivery Orders (DOs) and automatically populate shipment data, reducing manual data entry by **40%**.
- Redesigned the invoicing module with validation-driven interactions and transparent pricing breakdowns, reducing billing errors and complaints from **~10% to under 0.5%** per an internal post-launch audit.
- Built and maintained a scalable design system using reusable components, design tokens, and standardized UI patterns across multiple enterprise products, reducing front-end implementation effort by **30%**.
- Collaborated closely with developers throughout implementation to ensure technical feasibility, design consistency, and production quality.
- Mentored junior designers, conducted design critiques and usability reviews, and promoted user-centered design practices across teams.

PRODUCTS DESIGNED

- **MatchLog Platform** — Enterprise SaaS for container lifecycle management
- **CASA** — Container Assessment & Survey platform for field inspection and reporting
- **STinder** — Container matching platform connecting supply and demand
- **ERP Admin** — Administration portal for operations and configuration
- **Invoice Management Module** — Billing and dispute-resolution workflows

UI/UX Designer

Apr 2017 – Apr 2021

Shiplyst Systems Pvt. Ltd. · Mumbai

- Led end-to-end UX design for **enterprise freight management and logistics platforms**, translating complex operational requirements into intuitive digital workflows.
- Redesigned an **email-based freight quotation process into a self-service digital booking platform**, reducing turnaround time from days to minutes.
- Designed high-density **carrier comparison dashboards** enabling logistics teams to evaluate 50+ parameters, including freight rates, transit times, and carrier performance.
- Conducted **user research, information architecture, wireframing, and prototyping**; also collaborated closely with engineering teams throughout implementation.
- Developed responsive **HTML5/CSS3 interfaces** with accessibility best practices, ensuring consistent experiences across desktop and mobile devices.

PRODUCTS DESIGNED

- **Shiplyst Platform** — B2B SaaS platform for freight management

Service Information Developer

Oct 2015 – Apr 2017

Hewlett Packard Enterprise · Bengaluru

- Designed enterprise console interfaces for **infrastructure monitoring and diagnostics**, translating complex technical information into clear and usable interfaces.
- Collaborated closely with engineering teams to deliver **responsive and accessible interfaces** aligned with technical requirements.

Senior Web Designer

Mar 2014 – Oct 2015

Varshaa Weblabs · Surat

- Designed responsive **dashboards, CMS platforms, and property-management applications** for web-based business needs.
- Collaborated with developers to deliver **scalable, multi-tenant web applications** across different screen sizes and use cases.

Android Developer Intern

Feb 2013 – Feb 2014

Infusion Infotech · Surat

- Designed and developed Android application interfaces as part of an internship project, focusing on responsive layouts across multiple screen sizes.
- Translated project requirements into intuitive mobile experiences while working within Android development constraints.

EDUCATION & CERTIFICATIONS

- **Master of Computer Applications (MCA)** – Shree Devi Institute of Technology (VTU), 2010–2013
- **Bachelor of Computer Applications (BCA)** – CASPS (VNSGU), Surat, 2007–2010
- **Certification: Generative AI Fundamentals** – Google
